Public Works Project Updates: Summer/Fall 2011
[Map of Projects]

The following Public Works projects may impact traffic during the Summer and Fall as noted below. **Keep in mind that these schedules may be affected by inclement weather and other unforeseen conditions**. For general information, contact Chris Schneiter, Assistant Public Works Director/City Engineer at 420-5422.

Projects Under Construction

1. The **Pacific/Center Roundabout Project** at the Depot Park intersection is fully operational. Signs, landscaping, streetlights and decorative concrete have not been completed. This project is funded by federal stimulus funds. Minor traffic delays can occur during the day. Contact: Josh Spangrud, 420-5178.

2. The **West Cliff Drive Phase 2 Project,** from Almar to Swanton, has been awarded to Don Chapin and Company. Access ramps have been completed. Street grinding and paving is scheduled for the week of July 5, 2011. This project is funded primarily by federal stimulus funds. Lane closures and detours will occur during the day, M-F (excluding holidays) and so traffic delays should be expected during construction. Contact: Tony Lau, 420-5177.

3. The **Harvey West Segment of the North Coast System Rehabilitation Project,** on River, Evergreen, Coral, Limekiln and Fern Streets and the Coral St Bike Path will begin on June 17, 2011. The City of Santa Cruz Water Department has contracted with Mountain Cascade, Inc. to replace the water mains under portions of River, Evergreen, Coral, Limekiln and Fern Streets, as well as the bicycle path adjacent to State Route 1. Expect traffic delays and detours in this area. Contact: Kalen Dodd, 420-5218.

   The following link is available for more information view the project map.

4. The **West Cliff Drive Phase 1 Path Rehabilitation Project,** from Bay to approximately the lighthouse, will be out to bid this summer, with construction anticipated in the fall. Path grinding, paving, and header board replacement will impact the use of the path. One lane of traffic will be detoured to allow pedestrians and bikes to occupy one of the traffic lanes. This project is funded transportation development act funds. Lane closures and detours will occur during the day, M-F (excluding holidays) and so traffic delays should be expected during construction. Contact: Tony Lau, 420-5177.
