Ocean Street Sewer Project

The City of Santa Cruz Public Works Department has contracted with Monterey Peninsula Engineering to replace the sanitary sewer on Ocean Street from Water Street to Graham Hill Road. Work will also performed on Blaine Pryce and Felker Streets and part of Hubbard Street and Washburn Street that connects to Ocean Street.

Construction Work will begin on Monday, February 4, 2013 at the intersection of Blaine and Ocean Streets. All work should be complete by May 14, 2013.

Parking on Ocean Street will be temporarily removed from Blaine Street to Plymouth Street on the northbound (heading to the freeway) side of the street for about two to four weeks. This will allow two lanes of northbound traffic on Ocean Street to be maintained during construction.

For more information anyone can visit: oceanstreetsewer.blogspot.com

Expect delays.
