

Information Technology

Information Technology

Department Description

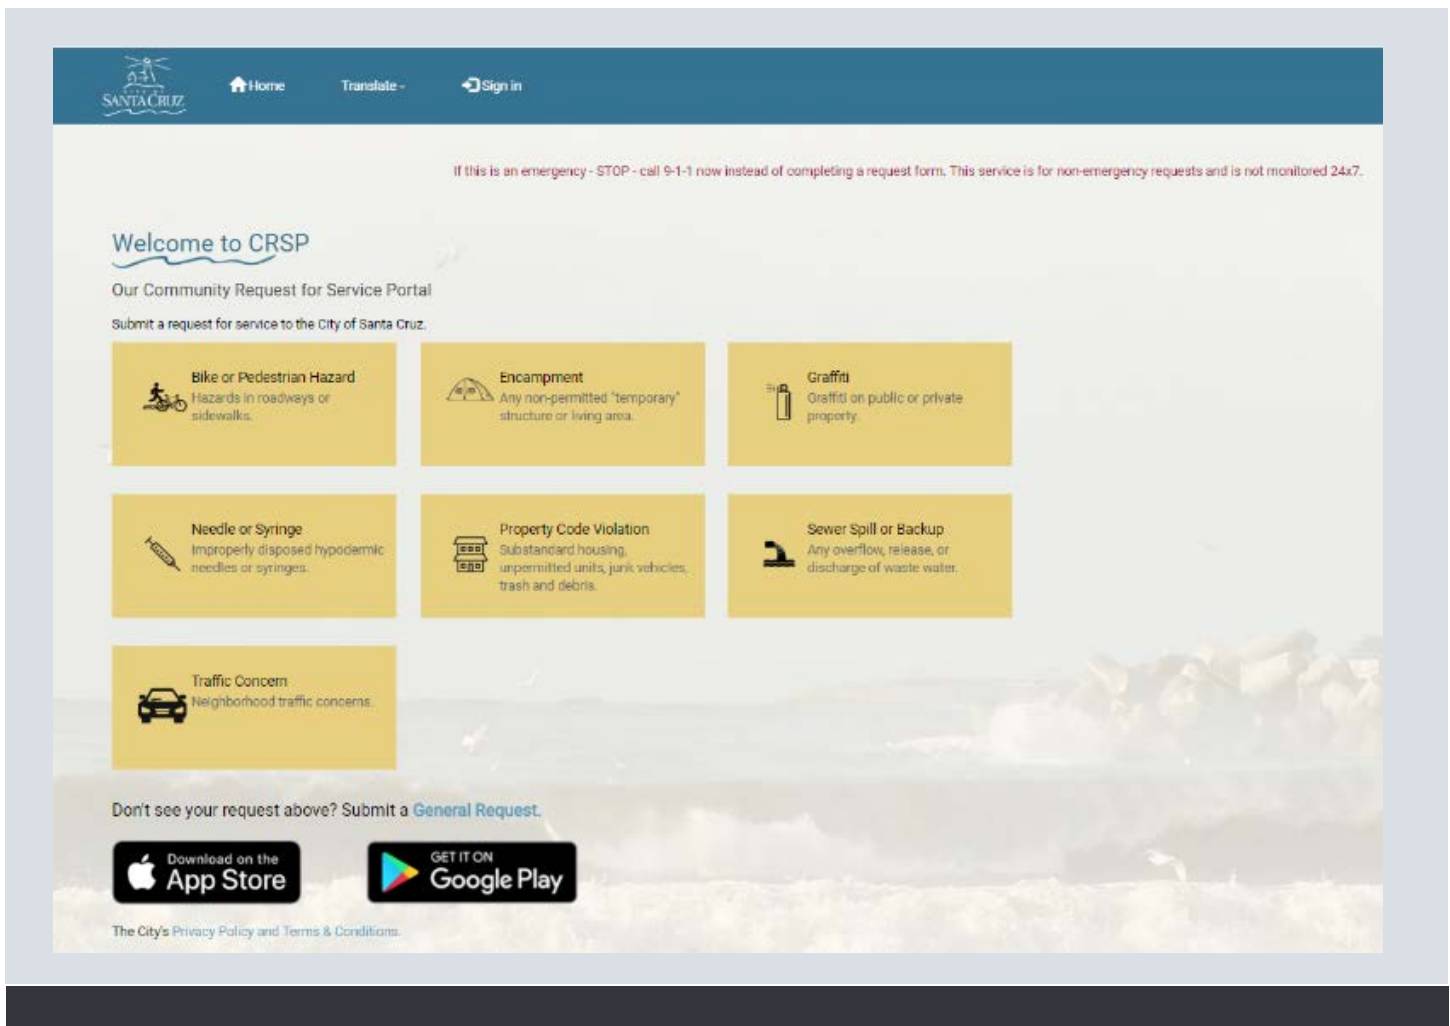

The Information Technology (IT) Department provides technology services to support fellow departments and the community. Our primary objective is to deliver business-driven, efficient, quality technology solutions and services for the City of Santa Cruz staff and the public. To this end, IT is organized into the following major areas: infrastructure and telecommunications; process and applications (including Geographic Information Services – GIS); client and systems administration; strategy and administration.

FY2019 Accomplishments

Community Safety & Well-Being

- Improved and expanded monitoring of City water and waste water treatment infrastructure and sources by completing upgrade of software and deploying to satellite sites.
- Delivered modern interview room capabilities at Police Department.
- Improved physical security at various City locations including City Hall's Annex, the Coast Pump Station, the Corporation Yard, Fire Administration, Fire Station 1, Frazier Lewis Lane (alley long the Soquel/Front Garage), Harvey West Clubhouse, Union/Locust Building, Water Treatment and Waste Water Treatment.
- Upgraded system for police records information.
- Increased stability and administration of police in car video system.
- Simplified and modernized community request for services through new application (Community Request for Service Portal – CRSP) – web-based and also available as an Android or iOS application.

<https://cosc-crsp.mendixcloud.com/p/Home>

Housing

- Supported code compliance through new Planning and Community Development cost recovery program.
- Started first steps (request for proposal) to determine best path forward for land management – permits, business licenses, inspections, code compliance, online plan check, rental, etc.
- Deployed technology at River Street Camp.
- Supported housing committees and various housing/other research needs via maps and GIS on-line layers.

Economic Vitality

- Started first steps (request for proposal) to determine best path forward for land management – permits, business licenses, inspections, code compliance, online plan check, rental, etc.
- Automated interface from parking system to cashiering.
- Increased garage parking and gate control features by beginning replacement of systems at City owned parking facilities.
- Delivered new GIS application for permit data:

Reliable & Forward-Looking Infrastructure and Facilities

- Improved payment card security by completing network segmentation for Payment Card Industry (PCI) compliance.
- Ensured network performance and reliability via upgrades and replacements at various sites including City Council Chambers, the Corporation Yard, Fire

Stations 2 and 3, Meter Shop, Union/Locust Building, Water Treatment and Waste Water Treatment.

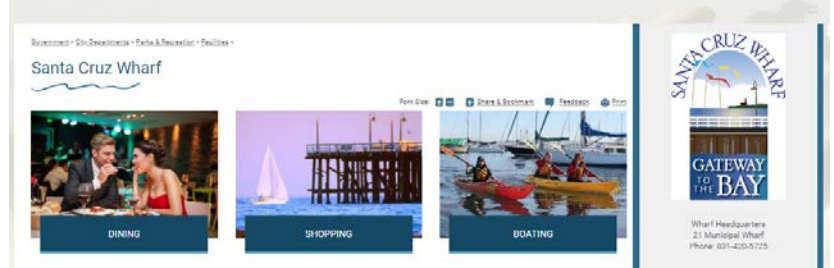

- Improved direct fiber connectivity for the City from the Clock Tower to the River St Garage and Cooper St traffic signal (back to City Hall).
- Supported the improvement of work space efficiency at City Hall's Annex, Loch Lomond/Newell Creek, Police Department and Union/Locust Building.

- Shored up integration between police data center and Santa Cruz Regional 911 (SCR911).
- Reduced risk and improved recovery capabilities with expanded backup and recovery tools, proactive security vulnerability assessments and more anti-virus forensic tools.
- Began vendor performance and technology improvements for network connectivity at various City facilities back to City Hall.
- Expanded capacity and improved reliability for storage at City Hall, the Police Department, Water Treatment and Waste Water Treatment.

Engaged & Informed Community

- Improved telephone features and upgraded version of City's voice over internet protocol system.
- Sized and scoped project to improve the City's agenda and document management platform.
- Supported transparency and access to financial information via new data tool.
- Enabled public to find and use location-based open data via a "hub" page that consolidates many features: <https://data1-cruzgis.opendata.arcgis.com/>
- Revamped design to make Wharf webpages more engaging and easier to navigate.

Financial Stability

- Completed annual personal computer (PC) replacements and uninterruptible power supply (UPS) maintenance.
- To maintain support and vendor software warranty, upgraded various systems, including the City's core enterprise resource planning, email, Parks & Recreation's reservation and registration system, parking meter management and work order management.
- Implemented annual fee changes for various City departments.
- Added ability for community to contest parking tickets online.
- Reliably managed and cost contained IT software and hardware maintenance.
- Began to improve security of payment card data movement via the issuance of a request for proposal for a file, information and event monitoring platform.

Environmental Sustainability and Well-Managed Resources

- Improved Water ability to report operational data points and make faster edits for elevation charges, storm water, water rates, and water usage.
- Improved management and administration of various resources via upgrades:
 - Fleet fueling (plus migration to virtual environment)
 - Power management
- Assisted with mapping of trees in City via issuance of request for proposal.

Organizational Health

- Educated and engaged City staff to be part of the solution for cyber security.
- Mitigated risks and educated users via more robustly documented standards for technology usage at the City.

- Enabled City staff to be more effective by offering training sessions for reports and systems and providing conference tools in City meeting rooms.
- Reduced processing time in departments and at Human Resources for recurring personnel forms and approvals.
- Updated IT employee skill sets and knowledge base via on-going department training opportunities.

FY2020 Goals

Community Safety & Well-Being

- Continue project to modernize and make sustainable the City's camera systems and physical access/door controls. FY20 targets include:
 - Soquel/Front Garage
 - Various Water pump stations
 - Additional locations based upon urgency of need and age of equipment
- Replace Police Department in car video system.
- Enhance crime analytics capacity and expand data sharing for Police Department.
- Expand police officer access to data and systems via technology improvements in patrol vehicles.
- Begin to work with other local agencies in Santa Cruz Regional 911's replacement of records management system for public safety.
- Add service types to City's Community Request for Service Portal (CRSP).

Housing

- Begin implementation of land management solution – permits, business licenses, inspections, code compliance, online plan check, rental, etc.
- Support housing committees and various housing research needs via maps and GIS on-line layers.
- Support technology needs at homeless housing location(s).

Economic Vitality

- Improve processes and on-line capabilities for land management, business licensing and permitting system.
- Complete roll-out of electronic plan check.
- Finish garage parking and gate control feature rollout by replacing systems at City owned parking facilities.

Reliable & Forward-Looking Infrastructure and Facilities

- Improve network performance and security at various City sites.
- Continue to implement PCI compliance items – specifically security information and event management (SIEM) and file integrity monitoring (FIM).
- Replace data center infrastructure at Water Treatment Plant and Waste Water Treatment Facility as needed for sustainability and supportability.
- Upgrade and/or replace aging network infrastructure as needed.
- Deliver internet access to Delaveaga softball fields to enable process efficiencies for Parks & Recreation leagues.

Engaged & Informed Community

- Begin migration of agenda and document management to vendor's replacement products.
- Refresh design of Human Resources web pages and expand content.
- Re-look at internet standards and site organization based upon compiling newer usage analytics since redesign has been live for over a year.

Financial Stability

- Complete annual personal computer (PC) replacements, with focus on removing Windows 7 machines.
- To maintain supported and under vendor software warranty, upgrade various City systems.
- Train City staff with new campaigns and content for cyber security areas each quarter.
- Continuously re-evaluate maintenance contracts to look for cost reductions via negotiations, consolidations, competitive pricing, etc.

Environmental Sustainability and Well-Managed Resources

- Implement urban tree mapping system.
- Issue request for proposal for new utility management solution.

Organizational Health

- Enable City staff to productively use mobile devices as an aid for service delivery by retiring all 3G cellular devices.
- Improve internal communication and sharing via modernization and functionality increases of City's intranet platform.
- Help employees more effectively manage e-waste (electronic waste) and email via recurring "eLighten" process.
